Description

Goblin Time Manager (GTM) is an online application designed to enhance productivity. By organizing projects and tasks in order of importance and time GTM will help keep you on task.

Target Audience

This application is intended for anyone needing assistance with time management. The average user will be between the ages of 14 and 45 and possess strong understanding of computers and the internet. The application will still be easy to use for those outside of the target audience.

This application also has the potential for managing guild activities in online roleplaying games.
